

TO WHOM IT MAY CONCERN

We write this reference in recommendation of Devcorp Australia as building contractor.

We had the pleasure of constructing 3 residential homes with Devcorp Australia. On each occasion, he was accurate in his costing of the projects and was flexible during construction to review and allow variations to help us to achieve the degree of finish we desired. His timely suggestions, helped us achieve a final home of a higher end finish than we anticipated. He tends to work with the same subcontractors (electrical, carpentry, cabinetry, stone work, water proofing, tiling) as they are proven and well chosen, hence able to achieve the consistent outcomes. He also has engaged excellent construction supervisors, who keep the construction process work flow moving forward, while keeping the workplace safe and tidy at all times. As a result, is able to achieve the finish of high end designer homes while maintaining tight control of the budget and time.

We have received so many compliments from our family and friend who have visited our home and seen the end result. Our home is a piece of art.

Mr Joseph Kahwaji, Managing Director's honesty and professional conduct sets him apart from any other builder. Mr Joseph Kahwaji, treated the construction process as if it were his own home, and worked hard to achieve the outcomes in terms of quality of work, cost and time.

We recommend his work without any reservation.
